

## Kevin M. Dean, Ph.D.

### Work Address

6000 Harry Hines Blvd. NL5.116A  
Dallas, TX 75390  
kevin.dean@utsouthwestern.edu

### Permanent Address

4420 Hollow Oak Dr.  
Dallas, TX 75287  
(303) 681-8863

## PROFESSIONAL ACCOMPLISHMENTS

My research portfolio includes 39 peer-reviewed manuscripts that have been cited 2100 times (h-index of 23). I am a MPI on an NCI Cellular Cancer Biology Imaging Research Center (U54CA268072) grant, an NIGMS Biomedical Technology Development and Dissemination Center (RM1GM145399) grant, and a Harold C. Simmons Comprehensive Cancer Center Translational Research Pilot grant. My lab is highly collaborative, and we also receive funding as a co-investigator, collaborator, or as key personnel, on 5 grants, including a P30, R01, R21, R34, and S10. I am listed as an inventor on 3 patents, including one that is licensed to Intelligent Imaging Innovations, Inc (3i).

## VISION

As a scientist, I am driven to develop and apply cutting-edge imaging technologies that provide molecular insight into incredibly complex biological processes and systems. My scientific training spans multiple disciplines, including biology, biochemistry, computer vision, fluorescence microscopy, and optical probes (including optogenetics, chemogenetics, and biosensors), and I have a strong history of leading and completing highly-technical, interdisciplinary, and collaborative research projects.

## RESEARCH AND WORK ACTIVITIES

### *Tenure-Track Assistant Professor*

2022 – Present

Lyda Hill Department of Bioinformatics and Cecil H. and Ida Green Center for Systems Biology.  
UT Southwestern Medical Center, Dallas, TX, USA.

Advanced fluorescence imaging of tissues, single cell sequencing, and other single-cell approaches have provided incredible insight into the earliest events in the metastatic cascade, including the growth of the primary tumor and invasion of single cells or cell clusters into adjacent tissues. In contrast, the molecular and cellular processes that enable colonization of a remote tissue are poorly understood and data are scarce. The overarching goal of the Dean Lab is to identify the molecular mechanisms that enable cancer cells to colonize and populate a distant tissue. To achieve this, we are developing a series of self-driving microscopes that leverage cutting-edge computer vision routines and adaptively image diverse specimens, and advancing integrated multiplexing imaging approaches using a combination of hydrogel-based tissue clearing and directed evolution of labeling technologies. Member of the Biomedical Engineering and Molecular Biophysics Graduate Programs.

### *Research-Track Assistant Professor, and Director of the Microscopy Innovation Lab*

2018 – 2022

Department of Cell Biology.

UT Southwestern Medical Center, Dallas, TX, USA.

The pace of microscopy technology development far outstrips the rate at which it can be commercialized and delivered to the greater biological community. The Microscopy Innovation Lab at UT Southwestern works to eliminate this delay by developing potentially transformative instrumentation that is tailored to address specific biological questions, and engaging in close collaborations with life scientists to gain molecular insight into physiological and pathophysiological phenomena. Towards these means, I work one-on-one with diverse biomedical scientists and physicians to develop custom imaging workflows that synergistically combine advances in optical probes, sample preparation, instrument design and operation, and computer vision-

based analyses of TB-scale datasets. Imaging systems include 1) two cleared tissue Axially Swept Light-Sheet Microscopes that achieve 300 and 650 nm isotropic resolution, respectively, throughout centimeter-scale optically cleared tissues, 2) a high-speed single-objective oblique plane light-sheet microscope with 200 and 450 nm lateral and axial resolution, respectively, 3) a hyperspectral TIRF system capable of imaging 6 genetically encoded fluorescent probes in living cells, 4) a 2 and 3-photon laser scanning confocal equipped with adaptive optics, extended depth of focusing, and rapid axial scanning for ultradeep intravital imaging, and 5) a mesoSPIM microscope for macro-scale imaging with 5  $\mu\text{m}$  isotropic resolution. Furthermore, through collaborations with the Danuser and Fiolka labs, a 6) 2-photon micro-environmental selective plane illumination microscope with 300 nm isotropic resolution, 7) a live-cell 1-photon Axially Swept Light-Sheet Microscope with 350 nm isotropic resolution, 7) a Field Synthesis variant of Lattice Light-Sheet Microscopy, 8) and a multi-directional illumination light-sheet microscope for imaging of developing organisms. Research combines biology, biophysics, optics, and computer vision.

*Founder*

2019 – 2022

Discovery Imaging Systems, LLC, Dallas, TX, USA.  
<https://www.discoveryimagingystems.com>

Established an LLC to provide customized and world-class imaging solutions to academic research centers. Business portfolio focused on new methods for imaging chemically transparent biological specimens with the cleared tissue variants of Axially Swept Light-Sheet Microscopy. Customer purchases third-party components, and Discovery Imaging Systems provides expert assembly on site and annual maintenance thereafter.

*Postdoctoral Fellow, Fiolka and Danuser Laboratories*

2014 – 2018

Lyda Hill Department of Bioinformatics  
UT Southwestern Medical Center, Dallas, TX, USA.

Development and application of light-sheet microscopy and computer vision technologies to elucidate mechanisms of cell-extracellular matrix adhesions, Rho GTPase signaling, and cytoskeletal dynamics of breast cancer cells disseminating into 3D tissue-like environments. Ruth L. Kirschstein Postdoctoral Fellow. Research conducted under the guidance of Drs. Reto Fiolka and Gaudenz Danuser.

*Director, BioFrontiers Advanced Imaging Resource*

2013 – 2014

BioFrontiers Institute  
University of Colorado, Boulder, CO, USA.

Established first campus-wide microscopy facility and expanded user base expanded to over 100 users from eight departments, two universities, and two biotechnology firms. Led a collaborative team in the building and development of novel microscopy and super-resolution instrumentation and techniques; executed independent research; provided facility strategic vision; organized analytical training for users; worked with researchers to develop customized protocols and assays; collaborated with faculty to compete for grants and contracts to support facility research activities and lead infrastructure grants; interfaced and worked closely with industrial users. Directly reported to the Chief Scientific Officer, Dr. Leslie Leinwand, and Dr. Tom Cech.

*Graduate Research Assistant, Palmer Laboratory.*

2007 – 2013

Department of Biochemistry  
University of Colorado, Boulder, CO, USA.

Investigated the role of site-specific mutations in dark-state conversion and irreversible photobleaching for red-fluorescent proteins; developed high-throughput microfluidic cell-sorter capable of measuring fluorescence lifetime and the rate of photobleaching on single mammalian cells; directed-evolution of red-fluorescent proteins for improved photostability; collaborated with other lab members on the development and evaluation of optical biosensors. Research conducted under the guidance of Drs. Amy E. Palmer and Ralph Jimenez.

*Undergraduate Research Assistant, Williamson Laboratory.*

2003 – 2006

Department of Chemistry  
Willamette University, Salem, OR, USA.

Development of semi-automated laser light scattering instrumentation and the measurement of highly accurate and precise binary liquid-liquid phase diagrams. Research conducted under the guidance of Dr. J. Charles Williamson.

## EDUCATION

*Ph.D.*, Biochemistry GPA: 3.9  
University of Colorado, Boulder, CO, USA. 2007 - 2013  
*Dissertation:* Fluorescent Proteins: Spectroscopic Studies, Microfluidic Analysis, and Generation of Improved Variants. Research conducted under the guidance of Drs. Amy E. Palmer and Ralph Jimenez.

*B.A.*, Chemistry GPA: 3.64  
Willamette University, Salem, OR, USA. December 2002 - 2006  
*Thesis:* Laser Light Scattering Investigations of the Isobutyric Acid/Water Binary Liquid System. Research conducted under the guidance of Dr. J. Charles Williamson.

## OTHER TRAINING

Marine Biological Laboratory, Woods Hole, MA. (2016)  
Computational Image Analysis, Summer Course.  
Directors: Lani Wu, Steven Altschuler, and Gaudenz Danuser

## CURRENT GRANT SUPPORT

- 2023 – 2024    Next-Generation Histopathology Using Rapid Ultraviolet Photoacoustical Microscopy .  
Harold C. Simmons Comprehensive Cancer Center, UTSW.  
*MPI*
- 2023 – 2024    Illuminating the Molecular and Cellular Origins of Tissue Function in Health and  
Disease.  
President's Research Council, UTSW.  
*PI*
- 2021 – 2026    UTSW-UNC Center for Cell Signaling Analysis.  
National Institute of General Medical Sciences, NIH.  
RM1GM145399  
*MPI*
- 2021 – 2026    Imaging Mechanisms of Metastatic Tumor Formation in Situ  
National Cancer Institute, NIH.  
U54CA268072  
*MPI*

## PREVIOUS GRANT SUPPORT

1. 2022 – 2023    Mechanisms of Cell Rearrangements During Germband Extension in *D. Melanogaster*.  
National Institute of Child Health and Human Development, NIH.  
R21HD105189  
*Collaborator*
2. 2022 – 2023    Linking Function, Structure, and Molecular Identity of Lateral Habenula Neurons.  
National Institute of Mental Health, NIH.

R34NS121873

*Collaborator*

3. 2021 – 2026 UTSW Cancer Center Support Grant  
National Cancer Institute, NIH.  
P30CA142543  
*Key Personnel*
4. 2020 – 2025 Prune Belly Syndrome: Mechanisms of Filamin A Mutations.  
National Institute of Diabetes and Digest and Kidney Diseases, NIH.  
R01DK127589  
*Co-Investigator*
5. 2020 – 2024 Neuronal Signaling Mechanisms of Stress-Induced Anhedonia in the Lateral Habenula.  
National Institute of Mental Health, NIH.  
R01MH120131  
*Collaborator*
6. 2019 – 2020 Laser for Ultra-Deep Intravital Imaging.  
National Institute of General Medical Sciences, NIH.  
S10OD026722  
*Key Personnel*
7. 2016 – 2018 Symmetry breaking and polarization of cells in 3D environments.  
National Institute of General Medical Sciences, NIH.  
F32GM117793  
*Principal Investigator*
8. 2011 – 2013 Integrative Graduate Education and Research Trainee (IGERT)  
Computational, Optical, Sensing and Imaging.  
Division Of Graduate Education, NSF  
0801680  
*Trainee*
9. 2009 – 2011 Interdisciplinary Predoctoral Training in Molecular Biophysics.  
National Institute of General Medical Sciences, NIH.  
T32GM065103  
*Trainee*
10. 2006 – 2007 Sigma Xi Undergraduate Research Fellowship.  
*Trainee*

## PATENTS

1. 13,360,706 – Optically Integrated Microfluidic Cytometer for High Throughput Screening of Photophysical Properties of Cells or Particles.
2. 62,155,980 – Uniform and Scalable Light-Sheets Generated by Extended Focusing.
3. 16,093,561 – Light-Sheet Microscope with Parallelized 3D Image Acquisition.

### INVITED TALKS

1. Light Microscopy Australia. Melbourne, VIC, Australia, 2024.
2. Microscopy & Microanalysis. Minneapolis, MN, USA, 2023.
3. EMBL-Janelia Bioimaging Seminar Series. Virtual. 2023.
4. MC2 Image Analysis Working Group. Virtual. 2023.
5. Willamette University. Salem, OR, USA. 2023.
6. Photonics Media Webinar Series. Virtual. 2022.
7. CLEO: Laser Science to Photonic Applications Technical Conference. San Jose, CA, USA. 2022.
8. Light-Sheet Conference and Workshop, MBL. Woods Hole, MA, USA. 2022.
9. IQ Health Science & Engineering, Michigan State University. Lansing, MI, USA. 2021.
10. Photonics Media Webinar Series. Virtual. 2020.
11. Imaging ONE WORLD Series. Virtual. 2020.
12. Next Generation Microscopy Workshop. Cambridge, U.K. 2019.
13. Cell Biology Seminar Series, Denver University, Denver, CO, USA. 2017.
14. Andor Academy, University of Colorado, Boulder, CO, USA. 2014.
15. American Chemical Society, Orlando, FL, USA. 2019.

### INVITED WORKSHOPS

1. M2PC Workshop. Pacific Northwest National Labs. Virtual. 2021.
2. Software for Microscopy. Janelia Farm, Howard Hughes Medical Institute. Ashburn, VA. 2020.

### OTHER TALKS & PRESENTATIONS

1. Kevin M. Dean. American Society for Cell Biology (ASCB). Virtual. 2021.
2. Kevin M. Dean. Society for Neuroscience (SfN). Virtual. 2021.
3. Kevin M. Dean. EMBO & EMBL Symposium: Seeing is Believing - Imaging the Processes of Life. Virtual. 2021.

30. Kevin M. Dean, Joseph C. Williamson, Student Scholarship Recognition Day, Salem, OR, USA. 2006.
31. Kevin M. Dean, Joseph C. Williamson, Northwest Undergraduate Science Research Conference at Oregon Health & Science University, Portland, OR, USA. 2006.
32. Kevin M. Dean, Joseph C. Williamson, Student Scholarship Recognition Day, Salem, OR, USA. 2005.

## CONFERENCE PAPERS

1. Zach Marin et al, Autonomous Multiscale Axially Swept Light-Sheet Microscopy. Microscopy & Microanalysis, 2023.
2. Hazel Borges et al, Quantitative Cleared Tissue Imaging. Microscopy & Microanalysis, 2023.
3. Kevin M. Dean et al, Microfluidic Flow Cytometer for Multiparameter Screening of Fluorophore Photophysics. IEEE, 2014.

## CONFERENCE ORGANIZING

2023	CLEO: Laser Science to Photonic Applications Technical Conference.
2022	Biomedical Applications Program. OSA Biophotonics Congress.
2022	BRAIN Technical Program Committee. OSA Biophotonics Congress.

## STUDY SECTION

2023	National Institutes of Health, Neurotech. and Vision Review Special Emphasis Panel.
2022	National Institutes of Health, Neurotech. and Vision Review Special Emphasis Panel.
2022	Netherlands Organization for Scientific Research (NWO, the Dutch Research Council).
2019	Netherlands Organization for Scientific Research (NWO, the Dutch Research Council).

## TEACHING EXPERIENCE

2024 – Present	Lead Instructor, Introduction to Python, UTSW.
2024 – Present	Instructor, Optical Imaging and Probe Engineering, UTSW.
2023 – Present	Lead Instructor, Introduction to Python Software Development on GitHub, UTSW.
2022 – Present	Discussion Leader, Responsible Conduct of Research, UTSW.
2021 – Present	Assistant Instructor, Computational Image Analysis, UTSW.
2015 – 2019	Assistant Instructor, Optical Microscopy, UTSW.
2013 – 2014	Laboratory Assistant, Light Microscopy, University of Colorado.
2007 – 2008	Teaching Assistant, Introductory Chemistry, University of Colorado.
2006 – 2007	Tutor, Introductory Chemistry and Physical Chemistry, Willamette University.

## INSTITUTIONAL COMMITTEES

2022 – Present	Molecular Biophysics Work-In-Progress Evaluator.
2022 – Present	UT Southwestern Committee on Improving Research Staff Recruitment and Hiring.
2022 – Present	Lyda Hill Dept. of Bioinformatics and BME-Computational Biology Retreat.
2022 – Present	UT Southwestern Graduate School Admissions Committee.
2021 – Present	Dept. of Biophysics and Lyda Hill Dept. of Bioinformatics Faculty Search.
2021 – Present	Faculty Senate at UT Southwestern.
2021 – Present	UT Southwestern Medical School Admissions Committee.

## SCIENTIFIC MENTORSHIP

2022 – Present	Melissa Glidewell, Research Associate, UT Southwestern Medical Center.
2022 – Present	Xiaoding 'Annie' Wang, M.S., Software Engineer, UT Southwestern Medical Center.

2022 – Present	Zach Marin, Ph.D., Postdoctoral Fellow, UT Southwestern Medical Center.
2021 – Present	Jinlong Lin, Research Technician I, UT Southwestern Medical Center.
2021 – Present	Hazel Borges, M.S., Research Assistant I, UT Southwestern Medical Center.
2021 – 2022	Renil Gupta, High-School Student, St. Marks H.S.
2021 – 2023	Dax Collision, Software Engineer, Atmos Energy.
2021 – 2022	Samir Mamtani, Undergraduate Student, University of Wisconsin.
2021 – 2022	Sampath Rapuri, Undergraduate Student, Johns Hopkins University.
2019 – 2021	Evgenia Azarova, Graduate Student, Johns Hopkins University.
2019 – 2019	Ryan Hammond, Undergraduate Student, Carnegie Mellon University.
2018 – 2019	Qiuyan Shao, Principal Data Scientist at Capital One.
2018 – 2020	Saumya Vora, M.S., Regulatory Affairs Specialist at Medtronic.
2012 – 2014	Pia Friis, Laboratory Technician in Clinical Microbiomics.
2012 – 2013	Jordan Gringauz, Law Student, Washington College of Law.
2011 – 2013	Derek Gann, Owner and Engineer of CAFE Circuits and Software.
2010 – 2011	Jennifer Binder, Graduate Student, Arizona State University.

### TRAINEE GRANT SUPPORT

2023	Hazel Borges, Carl Storm Underrepresented Minority (CSURM) Fellowship.
------	--

### DISSERTATION COMMITTEES

2020 – Present	Harshida Pancholi, Roberts Lab, Dept. of Neuroscience, UTSW.
2020 – 2022	Byron Weiss, Danuser Lab, Lyda Hill Dept. of Bioinformatics, UTSW.

### DISTINCTIONS

2023	Recipient, Distinguished Researcher Award from the UTSW President's Research Council
2022	Inductee, Weed High School Hall of Fame.
2018	Dean's Discretionary Award, UT Southwestern Medical Center.
2018	Runner-Up, UTSW Brown-Goldstein Excellence in Postdoctoral Research.
2016	Nominee, AAAS/Science Program for Excellence in Science.
2015	Finalist, 2015 Educational Award, Edmund Optics.
2011	Certificate of Achievement, Colorado Photonics Industry Association (CPIA).
2007	Excellence in Graduate Teaching.
2007	ESPN & CoSIDA District 8 Academic All-American.
2007	Inducted into National Football Foundation Hampshire Honor Society.
2007	Co-Recipient, Henry Booth Outstanding Senior Male Athlete Award.
2006	Willamette University Bill Trenbeath Award.
2006	ESPN & CoSIDA District 8 Academic All-American.
2006	Sigma Alpha Epsilon National Scholar.
2006	Willamette University Athlete of The Month.
2006	Northwest Conference Athlete of the Week.
2006	Willamette University Football Team Captain.
2005	Invited to Speak at the Murdock's NW Undergraduate Research Meeting.
2005	Willamette University Football Team Captain.
2005	Peterson Family Scholarship for Chemistry.
2005	Inducted into the Mortar Board National Honor Society.
2004	Sigma Alpha Epsilon National Scholar.

2004	Inducted into the National Society of Collegiate Scholars (NSCS).
2004	Selected for Science Collaborative Research Program.
2002	Haynes McHale Award.
2002	Neal Wade Award - Weed High School Outstanding Male Athlete of the Year.
2002	Inducted into California Scholarship Federation.

### **LEADERSHIP POSITIONS**

2007 – 2013	Sigma Alpha Epsilon - University of Colorado Advisor and Regional Director
2007	Coast 2 Coast 4 Kalan Memorial Bike Ride - Philanthropy Coordinator and Participant
2005 – 2006	Willamette University Football Team Captain

### **PHILANTHROPY & COMMUNITY SERVICE**

2016 – 2022	Neonatal Support Staff, Parkland Neonatal Intensive Care Unit
2015 – 2020	Science Advocate, Science Policy, Education, and Communication club (SPEaC)
2006	Participant and Organizer, Coast to Coast for Kalan Memorial Bicycle Ride
2004 – 2005	Participant, United Way Day of Caring
2004 – 2005	Participant, Willamette University Bearcat Day Student Athlete Youth Outreach
2002	Participant, Habitat for Humanity
